## 7. Material Specification

Terminal pad material: Tin - Plated Copper

Soldering characteristics: Meets EIA specification RS 186-9E, ANSI/J-std-002 Category 3

**Warning:** -Operation beyond the specified maximum ratings or improper use may result in damage and possible electrical arcing and/or flame.

-PPTC device are intended for occasional overcurrent protection. Application for repeated overcurrent condition and/or prolonged trip are not anticipated.

-Avoid contact of PPTC device with chemical solvent. Prolonged contact will damage the device performance.

<b>Time 25 °C to Peak Temperature :</b>	8 minutes max.

Note 1: All temperatures refer to of the package, measured on the package body surface.

### Solder reflow

- ※ Due to “Lead Free” nature, Temperature and Dwelling time for the soldering zone is higher than those for Regular. This may cause damage to other components.
1. Recommended max past thickness > 0.25mm.
  2. Devices can be cleaned using standard methods and aqueous solvent.
  3. Rework use standard industry practices.
  4. Storage Environment : < 30°C / 60%RH

### Caution:

1. If reflow temperatures exceed the recommended profile, devices may not meet the performance requirements.
2. Devices are not designed to be wave soldered to the bottom side of the board.
